

Michigan Wheat Program
Michigan Ag Environmental Assurance Program
Verification Recognition

The following is an outline of the recognition provided by the Michigan Wheat Program to wheat growers who become environmentally assured through the Michigan Ag Environmental Assurance Program.

A \$50.00 financial award is offered to wheat farmers. Funds are available to the verified farmer, not on each farm owned or verified. It is a one-time, once per person financial award. The funds are meant as a congratulations for all the time, hard work and energy farmers put into receiving verification.

Growers qualify who:

- Are verified on or after June 1, 2013 (as verified through MAEAP records)
- Currently grow wheat (as verified through MAEAP or grower records)
- Are obtaining their first verification in the cropping system (as verified through MAEAP records)

Recognition will be given to those who are MAEAP verified at the Michigan Wheat Program Annual Winter meeting. Those farmers who are verified or reverified after June 1, 2013 will be invited to attend the annual winter meeting and be recognized for their outstanding accomplishment. This recognition is not limited and wheat farmers will be recognized each time they are verified or reverified in a cropping system, although they are only eligible to receive the financial award once.
