

U.S. Wheat & Barley  
Scab Initiative

## Wheat variety survey for MI growers, 2016

Please share your zip code: \_\_\_\_\_

Michigan State University, in concert with the U.S. Wheat and Barley Scab Initiative and the Michigan Wheat Program, would like to learn which wheat varieties are currently being grown by Michigan Growers. The responses will help provide a better sense of the level of resistance/susceptibility to scab in the current wheat crop. That data will then be used to further develop research goals and future programming. The survey is split into white and red wheat varieties. Please put an "x" next to the varieties you planted in fall 2015 and fill in the number of acres of each variety. If you have any questions, please contact Martin Nagelkirk at nagelkir@msu.edu or (313) 648-2515.

<i>white varieties</i>				
X	variety name	planted acres	certified seed?	
			yes	no
	AC Mountain			
	Ava			
	Ambassador
